

Solid Surfaces

SONITE Solid Surface is a homogeneous blend of high-grade composite material and mineral fillers resulting in a beautiful and luxurious material. This versatile material can be used as wall paneling, table and countertops and is even capable of being constructed into furniture. Unlike natural stone, its nonporous structure offers resistance to stains and bacterial growth and offers exceptionally high chemical resistance to cleansing products.

SONITE Innovative Surfaces are revolutionary developments in surface covering materials. Each of our materials was developed in the spirit of pushing the limits of decorative design and technology to create the most innovative decorative materials available today.

Mosaics

Sonite mosaics are crafted from the finest quality materials to create one-of-a-kind surface decorations. Our mosaics are thinner and lighter than conventional ceramic or glass varieties, allowing them to be easily applied not only on walls and ceilings but also in hard-to-fit spaces including corners and edges, curved areas and table and countertops. Individual tiles adhere well to substrates such as glass, gypsum board, wood, cement and other surfaces. Each design within the Mosaic product line has its own distinct appeal and will convey a singular presence in any space used.

Bespoke/Murals

SONITE Bespoke custom service gives designers the creative freedom to achieve unique patterns, graphics and artwork thus opening the door to unlimited design capabilities. Each tile sheet is precision-cut based on the custom designs specified and then hand assembled into square sheets for easy installation. Our unique process results in clean lines as compared to conventional pixelated mosaics of the past. Conceptual designs and artworks that have been difficult to achieve in mosaic are now possible with SONITE Bespoke.

Tiles

SONITE Tiles are crafted from the same high quality composite materials as our mosaics line. We offer a curated selection of materials that express themselves further as larger pieces. SONITE tiles are manufactured with our signature concave and convex surfaces that evoke a tangible sense of depth and texture. The slight variation inherent in each unique tile arises from our highly specialized technique of individual material sculpting.
