HUSK

MADE WITH NATURAL RICE HUSK

Rice has long been a major food staple throughout the world. Its production, however, results in substantial amounts of agricultural waste, primarily discarded husks. At Sonite, we've developed innovative ways to recycle such material and in the process create beautiful new objects.

Each Husk Object piece combines the distinctive colors and textures of natural rice casing with Sonite's advanced bio-composite design technology. Products include serving trays, coasters, sphere boxes, flower pots, placemats and other pieces at once functional, decorative and ecologically friendly.

Sonite's Husk Object collection comprises six color tones, all of which strike an ideal balance between natural warmth and contemporary chic.
