THE COMPANY

The determination to get closer to nature was the impetus behind our development of a series of items entailing upcycling of waste materials that were creating problems for our community. The nature of, and in, our products allows us to reach far beyond what we thought possible.

Our passion is innovation, but we don't want to pay any price for it. Instead, we want to leave a good mark in the society we live in by turning waste challenges into high-value upcycled accessories.

As industrialists, we provide quality, efficiency and solidity but are mindful of a contract with nature. Therefore, our technology is applied in a hand-crafted manner, allowing every single piece of our designs to be unique in its own way.

This is what we see as the future of design.

DÉCOR BY SONITE

Sonite's DÉCOR is the result of our concern for the environment combined with our passion for innovation and design. Our products are crafted from innovative materials with all the lower-carbon footprint properties associated with our signature lightweight composites.

Rice husks, old banknotes, coconut fibers, thermoset plastics and ocean bound plastics are elements we upcycle into objects that enhance the look and feel of the original discarded products. We collect these raw materials from our neighboring communities, reducing pollution resulting from waste burning and dumping in landfills, fields and oceans.

Our design objects are an evolving collection of boxes, bowls, trays, cups, coasters, planters, basins and other items that exude natural beauty.

We have transformed unwanted materials into beautiful new accessories of high value and notable substance that can be used as impressive eco-luxury packaging. They all enhance their original raw materials and follow the principles of strength and durability. We do not do single-use products.

Available in different colors, our DÉCOR objects strike the perfect balance between refined natural beauty and modern elegance.

All our objects are made from locally-sourced leftovers. Since the production process is all in-house, OEM and custom design inquiries are possible.

OUR UPCYCLED MATERIALS

Our collection is made of innovative upcycled materials that allow us to create beautiful objects, reducing waste in the process by transforming left overs into marketable products. These are our unique materials:

Husk is made of rice husks discarded as part of the milling process in agriculture. It is a highly stable material with exceptional longevity and durability. The bio-composite Husk allows us to create objects that are both appealing and environmentally friendly while reducing waste from rice agriculture.

Cocco is made from coconut fibers. The original strands of the shell give the material an organic feel and strength. With a production of over one million tonnes annually, a large amount of coconut waste is produced in Thailand. By upcycling it, we contribute to a better environment.

Scapa is an innovative material that resembles reconstituted stone made from used thermoset plastic. As the raw material is highly resistant to heat, it cannot be melted and recycled. By crushing and mixing it with our high grade polymers, we create an innovative material with all the lower-carbon footprint properties associated with our signature lightweight composites.

Naturla is an elegant material made of natural stone. By peeling a thin layer from a block, we can produce beautiful stone elements of very low weight, and reduce their carbon footprint.

Talay is a highly resistant material made from ocean-bound plastic waste. Its beauty resides in the very dramatic effect that results from the random solidification of the original plastic pieces. Ocean-bound PET (polyethylene terephthalate) plastic waste is a public health hazard. By upcycling it, we are reducing potential ocean pollution.

E-marble The nature and technology allow us to reach far beyond what we thought possible. With our art technology E-marble is the perfect mixture of upcycling materials “Egg-Shell” and high-quality resin. These allow to fulfill all types of project, from residential to hospitality and generate interesting collaborations with the design community.

Chawa is made of the hyacinth, a natural material that are often found along the rivers. It is an obstacle to drainage in the rivers or canals the hyacinth is having a lightweight plant which is easily biodegradable.

| CUPS

CUPS

Our collection of cups consists of three models. Our Capsule cup is ideal for tea and coffee, and includes a lid to keep your favorite beverages warm. The Sake cup is a small glass influenced by the Japanese drinking tradition. Wonder cup was inspired by the Wonderfruit Festival and is perfect for outdoor use.

Available in Husk and Cocco, our upcycled cups are the perfect expression of an eco-design.

Capsule cup in Husk

Sake cup in Husk

WONDER CUP

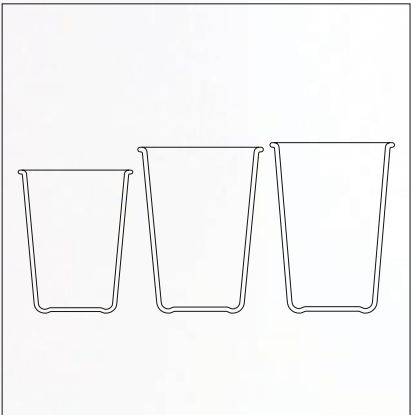

As a result of well feedback from customers, we have added choices of sizes and materials to the Wonder Cup. There are 2 sizes of Wonder Cup, 12oz and 16oz. Accordingly, we have 2 different kinds of material, rice husk and coconut fiber as options for the customers.

Wonder cup S 12oz is suitable for juice and other drinks to refreshing every meal. Besides, it is good to environment at the same time.

Additionally, we can make the Wonder Cup more outstanding by using laser to make logo or individual sentences. This encourages brands or companies to communicate with the customers in diverse occasions.

Wonder Cup S, M, L in Husk, Cocco

WONDER CUP
S : 89.5x110.7mm, M : 93x131mm, L : 89.5x134.2mm

WONDER CUP WITH LID

We intend to serve for unstoppable demanding, a wonder cup cover is developed with a high quality O-ring for functionality and durability. The lid has a hole for inserting a tube. Can be used with bamboo straws or stainless steel straws to reduce waste from plastic straws and glasses.

Sonite is ready to support resource reduction and reduce waste in everyday life through products designed for maximum utility.

Wonder Cup With Lid in Husk

Wonder Cup With Lid in Husk

CAPSULE TALL CUP WITH LID

CAPSULE DESIGN is another one of our popular collection. Its shape has the unique curve which we used it as a fundamental idea to develop Capsule Tall Cup with Lid. Apart from its utilities, this design is the perfect match with the Capsule Tray.

Capsule Tall Cup with Lid is compact. The lid is light and slim. With reference to The Jasmine design, the handle is made from genuine leather which enhances aesthetic appearance to the product.

Regarding its compact size and richness design, the product can decorate together with various items such as dressing table. Alternatively, it is suitable to put small towel or handkerchief into the Capsule Tall Cup for serving customers in spas, restaurants or hotels.

Capsule Tall Cup With Lid in Husk

CAPSULE TALL CUP WITH LID
71x123mm

Capsule Tall Cup With Lid in Husk

CAPSULE CUP L

Currently, CAPSULE COLLECTION has added products for containing paraphernalia, snacks and dry food. The CAPSULE shape that is larger and comes with 3 types of lids.

CAPSULE CUP L WITH LEATHER BAND LID and CAPSULE CUP L WITH LID are like the extended dimensions of previous capsule cups.

There is also a TAGINE TALL L designed with the same concept: Scaling up for more good value of use.

As always, you can choose between Husk, Cocco and E-Marble, a colorful eggshell material with unique patterns. Suitable for use in modern decorative style from a feeling like natural marble.

Capsule Cup L With Lid in Husk

Capsule Cup L in Husk

CAPSULE CUP S

Inspired by the Japanese-style “Yunomi” teacups, the cylindrical shape fits comfortably in your hand to savor the warmth and aroma of your beverage. Sonite is proud to present the CAPSULE CUP S made from upcycled materials that create the convex pattern is unique and also reduces the heat of the glass so that it can be easily held.

The intention is to develop products from upcycled materials with low carbon emissions that can be used in everyday life to products to create aesthetics, just like this.

PLATES & BOWLS

PLATES AND BOWLS

Our collection of Plates and Bowls is not just a set of functional containers. It is a range of design objects that delivers a personal touch to a space . Available in multiple colors and shapes, our upcycled Plates and Bowls are a lovely display of organic materials.

The shape and size of our bowls make them perfect for serving your cooking creations. Colorful and elegant, they are available in Husk and Cocco materials.

Bowl in Husk

Bowl in Cocco

DINING PLATE

Dining Plate set made from rice husk. We intended to create this set to be a part of dining table as a link for tightening a good relationship.

There are 3 sizes of Dining Plate which are 6", 8", and 10". With Earth-tone colors, Dining Plate fits in various dining occasions from an easy afternoon tea to a luxury dinner.

Our Dining Plate is designed to serve all ages. A proper weight makes it easy to carry. It is slim but strong and durable as well as easy to keep and clean.

The Dining Plate is certified for international standard. Furthermore, our Dining Plate also achieved the Design Excellence Award in 2021 (DEMark Award 2021).

| TRAY

TRAYS

Our collection of trays is designed to deliver the perfect combination of beauty and functionality. Made in a range of oval and rectangular shapes and sizes, they can be fashioned in multiple colors and materials.

To serve a breakfast in bed, present a dish in a restaurant, carry a coffee to a table, or to leave your keys and wallet, our upcycled trays are the perfect tool for cafeterias, eco-luxury hotels and home use.

Oval Tray and Round Tray in Husk

Capsule Tray in Husk

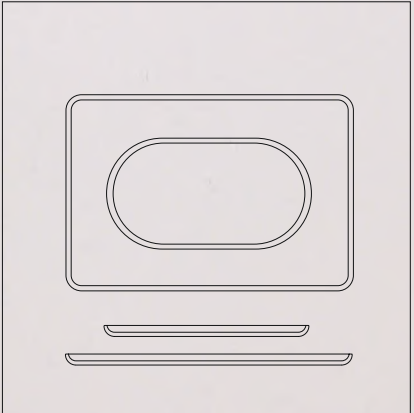

CAPSULE TRAY

CAPSULE TRAY is one of the most popular products. We discovered new innovations to create trendy material from “TALAY”. This material helps us to reduce ocean plastic, 2 bottles per 1 Capsule Tray.

TALAY was designed in white tone with unique transparent surface.

LOGAN TRAY

From the design concept of LOGAN COLLECTION, resulting in further development of tray products for use in placing items on the desk. Used to serve drinks on a small coffee table. Or place personal belongings on the bedside table. LOGAN TRAY is a compact shape. Its rounded edges and slightly tall bezels add a touch of modernity. Suitable for decoration in private residences, restaurants and hotel.

This is very good combination to be used in conjunction with other Sonite products such as CAPSULE CUP or TAGINE.

Coaster Pillow in Natura

| BOXES

BENTO BOX

Cherry blossom season in Japan has inspired our product "BENTO BOX". During this season, people usually go out for picnic under the trees with warm and joy. BENTO BOX is a 3-rack rice box with lovely lid that made from rice husk and coconut fiber.

BENTO BOX is designed to has 2 different shades; earth-tone from rice husk and bright-tone from coconut fiber for enhancing dining experience. The Bento that contains homemade dessert is an idea of noteworthy present in special occasions.

Bento Box in Husk, Cocco

Bento Box Round in Husk

TAGINE

Inspired by the shape design from Moroccan traditional food containers, the TAGINE BOX is outstanding in the lid and handle, with a perfect combination between upcycled materials and leather.

Currently, the TAGINE BOX has 3 sizes, S, M and L, which are considered the most popular products with appearance and utility. Including being able to laser text or logos on the leather handle to create a brand identity as well.

Tagine, Tea Tray M, Capsule Tray S in E-Marble

Tagine Tall in Husk

TISSUE BOX

With the intention of designing products from upcycled materials for everyday use. Sonite develop and offer tissue boxes made from Husk and Cocco materials.

To replace the most tissue boxes in market that are often made from plastic. To be a part of helping to reduce carbon emissions.

The cubic shape and slightly rounded edges are a minimalist aesthetic, that made with Sonite materials, make a distinct appearance in both color and texture.
Can be used to decorate the room interestingly.

| OTHER

BASIN

In the process of designing upcycled decorative objects, an important element to consider is the carbon footprint of the elements we create. That is what led us to produce a basin that combines the high resistance of our upcycled materials with a much lighter weight than most of the conventional products in the market.

The result is a light and elegant design that challenges convention and will fit in any context thanks to our wide range of materials and colors.

Basin in Scapa

NOTEBOOKS

For sketching, planning your week or writing down your shopping list, our upcycled notebooks are the perfect ally for your every day needs. Designed in standard A4, A5 and B5 sizes and available in more than 15 colors and textures, our notebooks are your perfect companion for work or home.

Notebook in E-Marble

Notebook in Husk, Cooco, Talay

BOTTLE

The simplicity of the cylinder inspired Sonite to develop a container for liquids. It can be used in many forms, whether it is SOAP BOTTLE / SHAMPOO BOTTLE, put shampoo or liquid soap.

Help reduce the use of disposable plastic bottles. DIFFUSER BOTTLE used to carry air fresheners, which is designed with wooden cover to create a fresh atmosphere in the room and environmentally friendly. The bottle can be selected in a two-tone color to create a variety of interior options.

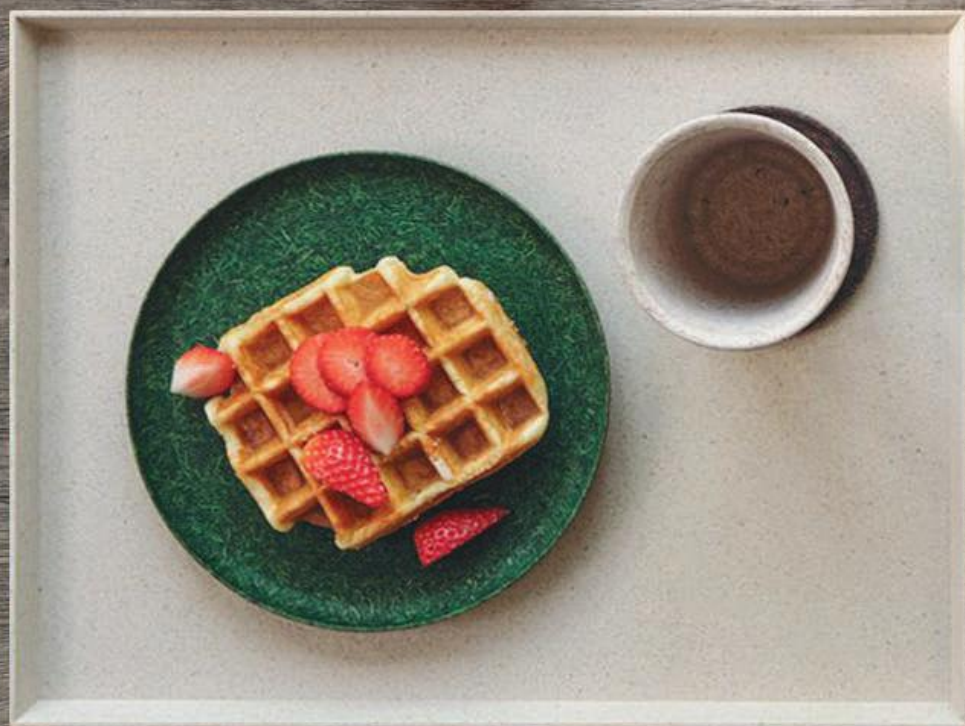

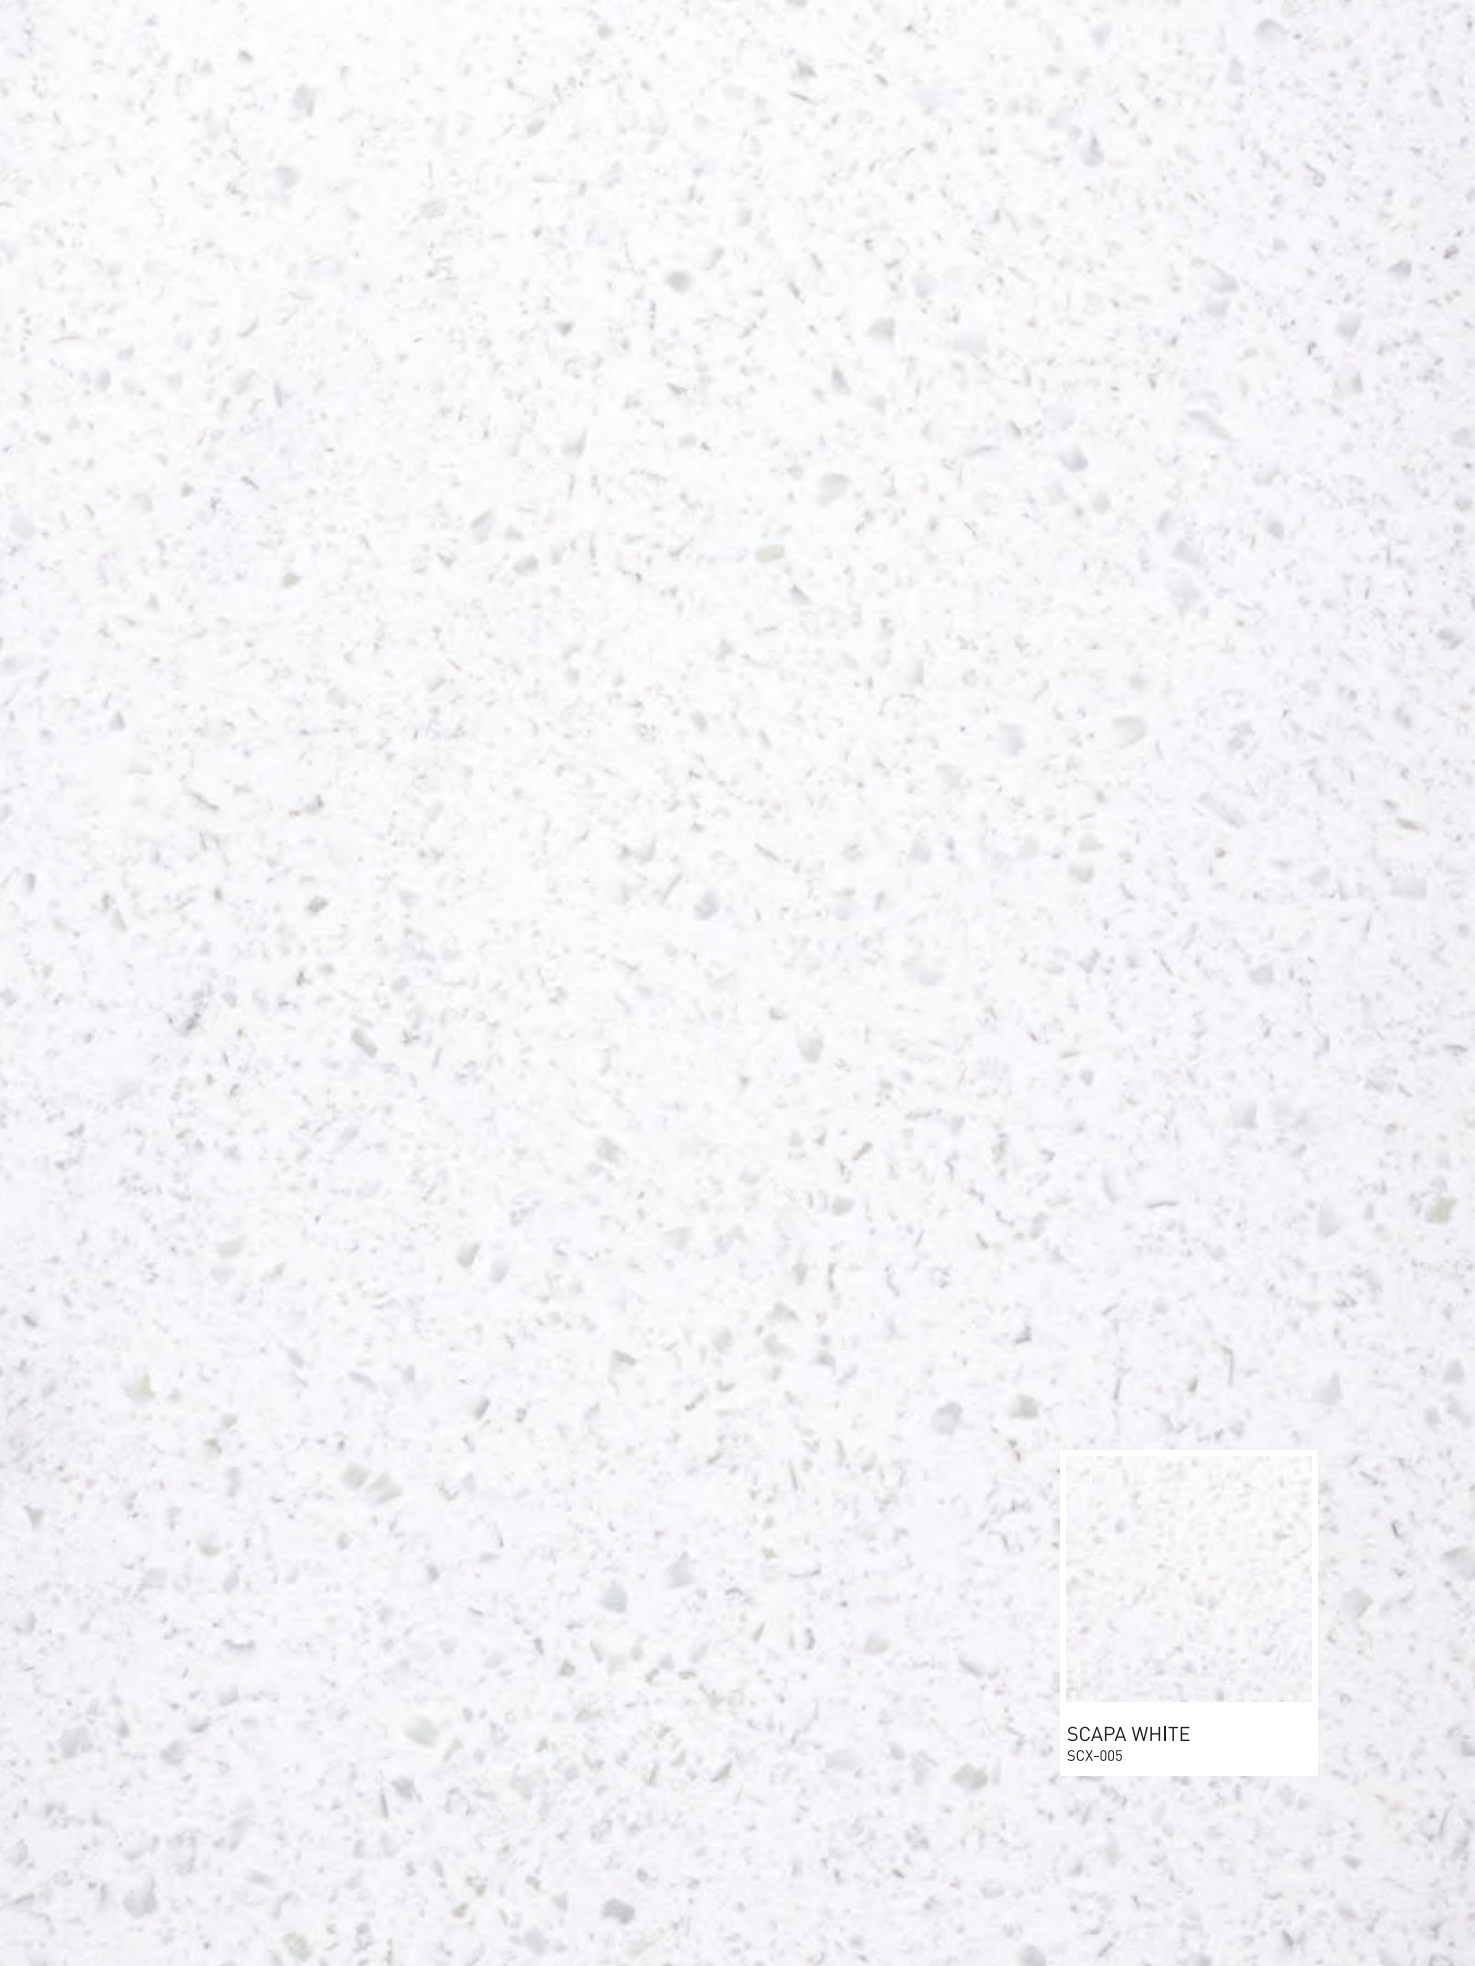

Diffuser Bottle in Husk

Soap Bottle in Husk

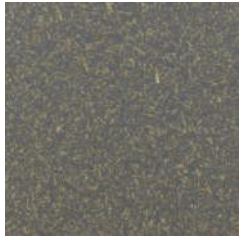

MATERIALS AND COLORS

Our innovative materials deliver textures and colors related to the nature of their source. Husk, Cocco and Naturla follow their bio-composite origin and organic essence. Kasse is the result of upcycling used Thai baht banknotes. Scapa and Talay take their color, texture and transparency from their original plastic components. The result is a creative palette of eco-luxury colors and textures.
